- Sketch

PROJECTS

Chart The Stock Market - https://github.com/Missarachnid/stock-chart

- Built with MERN stack, HighCharts, Bootstrap 4, IEX Trading API, MLab and Heroku
- Fully responsive, displaying up to 5 stocks, with symbol and company name
- The user can add stocks by typing its symbol in the search field

Udacity Final Project - Restaurant Reviews - https://github.com/Missarachnid/Udacity-project3

Udacity provided a base website and with improvements made during three projects to achieve:

- Responsiveness for desktop and mobile, responsive images and lazy loading
- Connects to a local server, where updates to the API for favorites and reviews are sent
- Service worker caches API data in an IDB database, other assets to local cache for offline use
- Lighthouse audit of 90+ scores for Accessibility, Performance, and Progressive Web App

Tic Tac Toe Game - https://github.com/Missarachnid/fcc-tictactoe

- A water-themed interface was created with JQuery plug-in with WebGL effects on interaction
- The user chooses their icon on game start and the game begins against an AI player
- A minimax algorithm returns the best move for the AI player
- After every move, a functions check for a winner, update score and alert who wins
