/Missarachnid

SKILLS

- HTML
- CSS
- JavaScript
- Node.js
- React
- Express
- MongoDB
- Angular 1.5
- JQuery
- WordPress
- Git/GitHub
- npm
- Photoshop
- Illustrator
- Sketch

PROJECTS

Chart The Stock Market - https://github.com/Missarachnid/stock-chart

This project fetches stock data from the IEX Trading API through the back end and sends the data to the front end where it is manipulated and displayed on a HighStock chart. The user can choose to add up to 5 stocks to add to the chart, and they can delete them as well. The Stocks that are currently displayed are saved in a MongoDB database using MLab. It was built with MERN stack and Bootstrap 4 and is responsive.

Restaurant Reviews Udacity Project1 - https://github.com/Missarachnid/Udacity-project1

This is the first project in the Mobile Web Specialist Nanodegree. We were given a starter project that had many problems: no responsiveness, bad accessibility, and no offline availability. The site now has a responsive with a grid layout. Picture and source elements were used to serve images depending on screen width. JavaScript was used to make sure dynamically created elements had the proper aria attributes to match those added to the HTML and to ensure proper keyboard interaction. A service worker was added to ensure offline usability.

Tic Tac Toe Game - https://github.com/Missarachnid/fcc-tictactoe

This is the classic game, except you play against an AI player. It was built with HTML, CSS, JavaScript, JQuery, and Bootstrap. It has a water theme and a JQuery plugin was used to cause ripples. The player gets to choose X or O and the game begins. The AI player is powered with a minimax algorithm using recursion to pick the best possible move. When the game ends the player is alerted of the win lose or tie and the score is updated. After a brief pause, the next round starts.

WORK HISTORY

Developer | Designer | Graphic Designer

Mobile Associates | Nov 17 - Present

Updating WordPress blogs, troubleshooting HTML layouts issues, making email templates, creating custom graphics, repairing other artists graphics, providing design recommendations and feedback on WordPress templates.

Tire Testin Technician

Toyo Tires| Jul 06 - Sep 17

Scheduling and conducting static and dynamic tests according to the company and government standards, troubleshooting machines and communicating with tire and Q.A. engineers.

Member of Women Who Code Atlanta

EDUCATION

Mobile Web Specialist Nanodegree

Udacity | Apr 18 - Oct 18

Grow with Google scholarship recipient. Subjects include responsiveness, accessibility, offline use, progressive web apps.

Front End Development Certification

Free CodeCamp | Dec 16

https://www.freecodecamp.org/missarachnid

Front End Development Track

Team Tree House | Dec 15

https://teamtreehouse.com/melissakepler

Associate of Science in Computer Animation

Full Sail University | Aug 04

Computer animation, 3d modeling, and texturing.
