- Node.js
- Express
- MongoDB
- Angular 1.5
- Bootstrap 3/4
- Git/GitHub
- NPM
- JQuery
- Flexbox
- Gulp/Grunt
- PHP
- Graphic Design
- Heroku
- AWS

WEBSITES

Atlantic Integrated Technologies - http://aitatlanta.com

The client requested a site he could update, showcasing services and images. A WordPress site was set up with a theme that had builder that could easily be used by the client. A plugin was added for a gallery layout that he preferred, an SEO plugin added with proper focus keywords for each page, and a Google Analytics account connected. The contact form will be updated after the server company resolves some issues.

PROJECTS

Chart The Stock Market - https://github.com/Missarachnid/stock-chart

- Built with MERN stack, Highcharts, Bootstrap 4, IEX Trading API, MLab and Heroku
- Fully responsive, displaying up to 5 stocks, with symbol and company name
- The user can add stocks by typing its symbol in the search field

Restaurant Reviews Udacity Project1 - https://github.com/Missarachnid/Udacity-project1

Udacity provided a base website and with improvements made during 3 phases to achieve:

- Responsiveness for desktop and mobile, responsive images and lazy loading
- Connects to a local server, where updates to the API for favorites and reviews are sent
- Service worker caches API data in an IDB database, other assets locally for offline use
- Lighthouse audit of 90+ scores for Accessibility, Performance, and Progressive Web App

Tic Tac Toe Game - https://github.com/Missarachnid/fcc-tictactoe

- A water-themed interface created with a JQuery plugin with WebGL effects on interaction
- A minimax algorithm returns the best move for the AI player
- After every move, a function updates the score and checks for a winner
